6 NEWS

HERE ARE THE ED LINES

I'm as mad as a monstrously mental March Hare this month, readers.. Spring has sprung, the sun is shining, my goatie beard has made a belated (bleated?) come-back and the C64 scene is, well, if not as buoyant as ever, then certainly still thriving!

Commodore finally bundled the curvaceous C64 with a disk drive just before Xmas, and put it on sale for the very reasonable price of just £150 (while stocks last...). Praise be! For now our little 8-bit buddy is finally set to give the 8-bit consoles a real run for their money. I wonder just how many C64 packs did sell last Christmas?

On the software front things are looking up, too. We're still waiting for a finished version of Lemmings to arrive, but our friends at Alter Developments in Holland assure it won't be much longer. Here's hoping!

Meanwhile, life goes on in the Commodore Force office. Ian's hyperventillating at the prospect of his girlfriend moving in with him (she must be madder than me!), Chris is as chuffed as a very chuffed person indeed to be receiving more tips per week than Corky did in the whole time he was here, and Miles... what can I say? He's still as nutty as a squirrels doings only his hair's a bit cleaner. In fact, he's lumbering around looking like an extra from a Silvikrin advert!

Ah well, on with the issue. I think I'll retire to my little rubber room for a while now and leave the rest of the team to it. It's nice and quiet in there, and there's no danger of those nasty purple fribble querts popping up up and awaaay, in my beautiful brass aquarium... (normal service will be resumed as soon as the Sunny Daze Sanitorium deem it wise!)

West Bishes,

Steve

ALTERNATIVE
EDUCATION

Iternative Software (in conjunction with the BBC) have released an educational package based on the TV show Playdays, almed at the 3-to-8 age group. The game includes several programs designed to tax the very vista of your child's intellect.

You're led through the game by one of the Playdays characters, who gives instructions as you go. There are thirteen sections in all, from the headsdown slog of the spelling and counting tests to the tun, Fun, FUN of Treasure Hunt and Snap. Also included in the packaging are some notes for parents, a set of words-and-pictures

matchcards and a preview copy of Aunty Beeb's Playdays magazine.

Graphics are basic and blocky, but nevertheless colourful and friendly. A strange quirk though

in the spelling games, rather than typing in the words via the keyboard the letters must be highlighted on screen using the joystick. How novell IF YOU CAN'

WHICH GAMES DID THE COMMODORE FORCE TEAM USE AS EXCUSES FOR MISSING THEIR DEADLINES THIS MONTH?

STEVE SHIELDS

At last! One of my all-time favourite C64 games has just been bettered. Having played US Gold's Leaderboard for the best part of a decade, I was nearly doing back-flips over Grandslam's Nick Faldo. Slick, quick and accurate — you won't get peed off after you've teed off, and that's FOUR! sure...

IAN OSBORNE

There's no doubt about it — the cream of this month's crop has to be Nick Faldo's Golf. This corker could hold it's own in any company, though as it happens it didn't have much competition — everything else has either been a massive disappointment

or not as good as it should've been!

BEAT 'EM,

one of three cities, each with it's own politics and culture — as in real life, where you go from here is entirely up to you. You can join one of the great guilds and earn a trade, make your fortune as a merchant or indulge yourself in one of the many quests on offer — Avalon is steeped in mythology, and there's plenty to excite the would-be adventurer!

Avalor is playable via a modern at two sites London and Sheffield and can be contacted on 071 928 0808 and 0742 671 671

respectively. New callers receive live hours free playing time.

Those without modems can go to the London offices and play on directly connected terminals

For further information contact: Avalon Europe Limited, The West Wing, 5-11 Lavington Street, London SEI DNZ or phone 071

MILES GUTTERY

If you like to be seen on the green but don't want to travel a 'fair way' (geddit) there's nowt better than Nick Faldo's Championship Golf to tee off with. Other than that, Stuntman Seymour from the Superstar Seymour compilation was ratther chuffsome. Take your pick!

CHRIS HAYWARD

Having waded through 50 shoot-'emups this month, my eyes can no longer focus on the world around me. Not that it's a bad thing, as I discovered some true classics salong the way. A LOAD OF BOLLISTICKS?

ow we've seen everything! Joysticks that look like tortoises, hand grenades, bugs. handlebars; you name it, we've seen it. Now Cheetah have surpassed themselves in creating a stick that looks like a boomerang, but would it come back if you threw it? And would you want it to anyway? Bollistick is a curious name for the device, as it's

actually driven by a console-style joypad. Two fire

buttons are included, with a rather nifty auto-fire function thrown in for good measure.

The problem with such astrongly ergonomic 'stick' as the Bollistick is it's difficult to

make it the right size to fit averyone's hands. Most of the team found it very comfortable, though a couple felt there was too little in their palms (depends what you're used to, I suppose! — Ed). As they could only make one size, we suppose they got it

about right.

Naturally, the proof of the pudding is in the pounding — now does the Bollistick measure up against your old stick-and-button machine? We didn't enjoy using it for shoot-em-ups as it just wasn't instinctive enough for our tastes, but it's ideal for Dizzy-type arcade adventures — you target you're holding it! The bottom line? Well, none of us felt the need to trade in our joysticks, but the choice is yours. The Bollistick won't be to everyone's liking, but it's good at what it does — check before you cheque.

BASKET CASE

hum, sorry, ground breakers, uh hum, sorry, ground breakers in the pinball industry have a novel new offering for you to pump ya pennies into. Hotshot Basketball is based on the home game HOT SHOT. This odd looking machine resembles a pinball machine with a basketball attachment stuck in the middle of the play area. Instead of the flipper belling a ball-bearing around the table, it flicks a basketball up in the air, the idea being to score a basket.

A specially-written soundtrack pounds along as you play, and there are five different games on offer, namely 3 Point Line, Hot Shot. Repeat A Shot, Around The World and Pushback.

All the excitement of pro-basketball action', boast Williams, Hmml We're not so sure it's the most accurate representation of the sport you're ever likely to see, but we're sure pinball wizards and flipper fanatics will find it a blast and a change from endless bonus traps, etc.

REEL AND CONTRACTOR

Buildie bushing, problem solving, roud rucing, bui 'n' builing — you name it, we give it to you! So let's get down to some RESL ASTITUTE.

ot only do we bring you the best C64
magazine in the entire multiverse, we also
slap on a couple of devilishly-good tapes
to add flames to the swellering saucepani All
novels start with an introduction, and as
COMMODORE FORCE is a best seller here's our
own particular preface...

Occasionally a hasty reader loads up the covertapes and becomes angered when he can't get a game or program to work. After throwing the tape in an old Jiffy bag (complete with aggressive letter condemning COMMODORE FORCE) he malls it pronto — then the teint recollection of tape instructions slowly emerges! After tentatively flicking through the mag, he happens upon REEL ACTION. The dumb git made a fool of himself, and after a few minutes reading the problem was sorted. Heed the words of Confucious Heyward and read the instructions BEFORE eagerly writing unhappy remarks.

DEALS ON REELS.

Got a disk drive? Wanna get this month's REEL ACTION raves on disk? All you have to do is cut out this coupon and slap it in an envelope with a cheque/PO for £1.49 (payable to Ablex Ltd) to; Ablex Audio Video Ltd, Harcourt, Halesfield 14, Telford, Shropshire TF7 4QR.DON'T SEND YOUR COVERTAPES, you get to keep those as well! ho says women are the weaker sex? It's not often you see a game where the leading character's a woman, so Saboteur 2 comes as a real breath of fresh air! You play a beautiful female ninja (getting pre-occupied with her looks are we? So much for anti-sexism — Dep Ed) who's sleek, elegant and punches your lights out without thinking. Her brother was fatally wounded during a daring mission (the first Saboteur outing) and she feels it her duty to right all that's wrong, avenge her brother's death, walk little old ladies across the road and make sure the trains run on time. Or something.

Your primary objective is to defeat an evil dictator's world-domination plan by redirecting the course of a nuclear missile. This involves finding a punched computer tape which is used to after the missiles flight path. The mission begins with a hang glider ride into a high security complex — locate and retrieve the computer tape and escape via motorbike through the only available exit tunnel. You need every sinew in your body and every weapon at hand. Why? Because the entire area (over 700 screens!) is patrolled by androids, bats and deadly black purmas!

very winter for centuries, a plague called the Nagroma ravaged the land. This narked the Elfin race so

they created an Elistone called the Inovar which had the power to raise a barrier known as the Cairnrue against Nagroma. Varwield Arthemin had the job of raising the Cairnerue in Winter and lowering it again in Spring, allowing rain to fall on the land.

o surprises here, folks — it's rip-roaring shoot-'em-up action all the way, and we love it to bits!

You command that cute little gun emplacement at the foot of the screen. Hoards of hungry helicopters hover overhead — you must blast them out of the sky, peppering the parachutists tool Before blasting you can taylor the game parameters to your own requirements — choose rapid fire or single shots, normal or guided missiles, a mobile or stationary base, and if you're really suicidal you can limit yourself to vertical fire!

Slap your joyslick in Port One and blast for your life — you've only one to play with, so look after it?

The game is jam-packed with features and options. There are two full 18-hole courses on offer, each of which is loaded in separately. Once you've made your choice and loaded up the appropriate course you can choose the number of players — up to four are available, including combinations of computer and human players. You can even go up against the man himself if you think you're up to it (or just fancy a sound beating). After selecting the players. you then decide whether you want 'matchplay the winner being the one who wins the most holes, or 'strokeplay', where the player who goes round the course in the least number of shots is the victor. Now at last it's time to kick your caddy into action, ayrtex your underparts and go for that proverbial hole-in-one!

Here you're presented with a nice 3D behindthe golfer view of the course, and options are accessed via a pull-down menu. Observing the lie of the ball and the distance to the green is vital to determine the right club for the job. Wilted Continent

Battlecards is set in the land of Vangoria, a wild and dangerous continent split asunder by warring factions. After the death of the Sorcerer Emperor Vangor, his three sons fought bitterly over the throne. Each allied himself with one of the three forces dominant in the continent; Justice, Chaos and Evil. It's on this shattered land

the blood of the Battlecards is spilt! In such violent and dangerous territory, fights to

the death are common. These are decided using a unique 'Scratch & Slay' combat system, using the same scratchoff ink found on lottery cards. Combat moves, spell casting, trading and treasure collection are all utilised in this way. When two 'champions' (heroes or monsters) cross swords, battle commences as follows; toss a coin to see who starts (or play one of the many card and yard games outlined elsewhere). The first player to strike then scratches off one of his opponent's head, body, arm or leg spots (see illustration), revealing a blank space (miss), a shield or spell icon (treat as blank in the basic game), or a wound. Play then passes to his opponent, who does likewise.

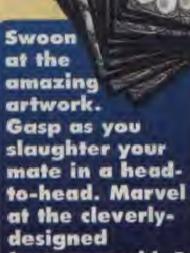

After the second and subsequent wounds, the attacker scratches one of his opponent's 'life' boxes. If a skull and crossbones is revealed, the fighter is dead, and the stricken warrior's card becomes the property of the winner. As well as being a valid collector's card, each win also carries a bounty - scratch the 'purse' spot to see what you've won!

Role Call

However, there's more to Battlecards than just scrapping. Within the set there are also ten Quest cards, consisting of puzzles solved through searching other cards for clues or symbols, eg in 'The Rings Of Harrak-Bur' you must search for five magical rings stolen during the sacking of Vangor's Capital at Constantia. The rings are printed on other cards — but can you find them?

Solving a Quest entitles you to a reward, a sum of gold collected by sending your solution to the publishers. This can be used to buy rare Wondrous Treasure' cards such as the Orb Of Shantos or the Amulet Of Eternal Beauty. They do appear in packs, but only very rarely (they're supposed to be valuable treasures after all), but can always be found in Robyn Steele's Trading Post as outlined elsewhere.

There are 149 Battlecards to collect, and they're available from all good newsagents, comic and game shops. At 50p for a set of eight they're far cheaper than most collect-and-swap outings, so what are you waiting for? Unsheathe that sword and get slashing!

fantasy world. Faint when you realise you've got a packet on the cover for free! Steve Jackson's BATTLECARDS are here, and they're here to stay says IAN 'SCRATCH AND SNIFF' OSBORNE...

GARGANIVAN

ZITTONIAN

rading cards are a multi-million dollar Industry in America. Footballers, baseball players, even famous murderers are sold and swapped all over the States, and with rare cards costing several thousand dollars each an equallylucrative forgeries market is rife.

However card-barmy as our stateside cousins may be (or maybe just plain barrny), unlike American exports such as The Simpsons, skateboards and herpies, trading cards never really caught on in the UK. But now all that could change. Games Workshop co-founder, Fighting Fanlasy writer and top vargame designer Steve Jackson has teamed up with Merlin Publishing to produce Battlecards, a swords and sorcery card collection with a difference!

Unlike normal tracling cards, Battlecards are more than just collectable images. The cards (and the world in which they're set) form a complete roleplaying game in itself, with heroes, villains, monsters, quests, treasure, magic, and everything else you expect to find in a Tolkenesque fantasy game.

OF VANGORIA

PLAY THE GAME!

The street urchins of Constantia while away the hours playing a number of Battlecards games, all of which are outlined on two cards in the series — Card Games and Yard Games. These pastimes are as much fun in the modern world as in mythical Vangoria, and offer an excellent way of winning Battlecards from your friends (if you're good enough).

To play Racing Cards, the contestants line up about three feet away from a wall. In turn, each fires (flicks between index and middle firigers) his card at it. The one who lands closest to the wall wins the other cards.

The curiously-named Smotherers Do Have 'Em is also played by firing cards, but this time you don't need a wall. The contestants flick their cards until one lands on top of another. however slightly, winning all the cards in play. A Vangonan version of Scissors, Stone and Paper uses the loons hidden under the text on the reverse of the cards — sword beats fist list beats shield, and shield beats sword.

For all these and more, check out the Yard and Card Games cards.

WHAT'S THAT FUNNY SPELL?

If spells are to be used, each combatant chooses (secrelly) a set number before starting — unequal numbers are permitted. Each time an attack reveals a spell symbol, the defender is then able to cast a spell by

scratching off one of the six spots on a spell card. Unless this reveals a miscast symbol, the spell takes full effect.

Each spell can only be used the spell can battle.

Iter the death of the Sorcerer-Emperor Vangor, the Continent Of Vangoria was thrown into a state of anarchy and strite. As the forces of Evil, Justice and Chaos stugged it out for the crown, the continent split into four separate territories.

Separated from the Southern Kingdoms by the Inam Feaks, The Darklands are dominated by the undead hordes of the Lord of Darkness to the East and tibes of Hill Gobins to the West. South-West of the Darklands is Quaine, name of the noble Prince Gallant, sworn enemy of the evil sorderer Lord Vengeance.

FURCE FRELD

The Eastern territories are a wilderness of demonic creatures, savage warlords and Barbanan Warrors forever locked in tribal wars. To the South lies Zittonia, ruled by Zheena Hightshade High Priestess of Gargantia, the god of exit. But the forces of truth led by Aragon Trueblade have begun to weaken her hold.

you missed. If you allack aims and his defended lags and body, you've so read a lift and can so alch an aim spot. When all durancer combarcards are established pick them op and stail again with a full hank.

Uhe basic combat the baltle continues until a combatant is filled. Though if both lighters die in the same round purses are enchanged but no stakes are won.

BARGAINS GALORE

obyn Stelle's Trading Post is one of the bestknown landmarks of Vangoria — perhaps that's why it's as common as muck in the Battlecards packs! The eight Wondrous Treasures of Vangoria are sold here. Just scratch off two spots, and if one's a treasure and the other's a sum of money, you can buy the artifact in question. If not sorry — sold out!

To buy the treasure you send the necessary dosh (Quest reward credits, stricken lighter's purses, etc.) to the publishers and they'll send you the treasure card in question.

At the heart of the Battlecards combat system are the 'Scratch and Slay' spots representing various body parts.

Combat icons are covered using scratchoff overprint.

On the reverse, the champion's details and combat rules are outlined, and the artist's signature displayed.

THE ART OF THE MATTER

altlecards are illustrated by some of the finest fantasy artists in it business, such as Les Edwards, Pet Andrew Jones, la McCaig, Terry Oakes, Alfan Craddock, Gino D'Achille and Waldmeister. They're already well known for their work on Fighting Fantas Gamebooks, board and role

playing games and record covers. Each artist has his own self-painted card, complete with tongue-in-cheek biographical notes on

LEVEL 4

Batten down the latches and sandbag your doorstep, here comes another crackling edition of the COMMODORE FORCE tips section, and heavens, what a section it is! You wouldn't believe the amount of letters I've received recently, there's so many I can hardly breathe! Not that I'm complaining - a cheery letter (from someone desperately trying to befriend me) always humours, so keep 'em comin'. A certain barbarian (namely Bash) is very angered that I'm roceiving adventure cheats. I know people prefer writing to me than that prehistoric potato, but it's best to keep the simpleton happy, so send all texty tips to his pastures instead. This month I proudly present playing tips on WINTER CAMP, SPACE CRUSADE, STEALTH FIGHTER, and oh what's the use, just read on!.

the Winter Camp guide

One day a whopping bonanzæa of an envelope hammered through the letter h box. It was so packed with tips that it took telen of us just to lift it! A tree would cry if it knew hovow much paper John Crompton from Wigan had us/sed in sending me the wealth of cheats that he didd, and here's one from the bundle for Winter Calamp.

LEVEL 1

Waggle the joystick and try to keep the pointer on the Yellow Arrow icon to increase speed. If you waggle too fast you'll slow down (isn't that always the way), and watch out for the last two opponents they cheat.

LEVEL 2

All the objects here are useful, To complete the level, save four fish and four other skaters. Once achieved you are confronted by the end level guardian. Select Bombs and throw them, run into the boss and knock him onto the bombs THE OBJECTS.

Jump gaps in the ice Throw at end-of-level boss

LEVEL 3

Throw snowballs at the bears poping out of the trees. The dark bears are the main concern, they retallate! Catch the falling flags for extra time.

Five drowning people and five canoers need savin from imminent death. To kill the bear at the end of the level, first throw honey at it, then select the football and bounce it off the basketball net and in the bee hive. Hit the nest enough times and the be fly out and attack the bear. All objects are useful.

LEVEL 5

Waggle the joystick to stop yourself falling off the crevasse, Clyde Radcliffe starts tapping lunes or icicles above him. Just remember the order he ta them out and repeat the sequence.

Thelemus

One of the best 64 games of all time and Toronto resident Steve Guidi has discovered a secret stage

On level 2 (torture 2), push the boulder into the snowball machine and wait 'fil it falls on the demon's head. Quickly jump in the machine and walk to the right. You're confronted by a series of happy faces, which can be collected for points — just avoid the ones that shake their heads back and torth or you exit the stage

Another level full of rescues, this time save six skiers and another six who are trapped in snowballs. To get the climbing equipment, pull down on the joystick when you get to the hut with the smoking chimney. Only hold the climbing equipment before you get to the building. Max will climb up and get the trumpet. Select this when you meet the walrus guardian. Hold fire and waggle the joystick to deafen it. Jump over the obstacles which roll your way. Eventually the ice will break and the watrus will plummet through. THE OBJECTS.

FLAGS CHAINSAW

WATER PISTOL

CLIMBING EQUIPMENT TRUMPET

Extra time. Cut trees that are in your way. Save people in snowballs Climb up building. Breaks the ice under end-of level quardian.

LEVEL 7

Maximus rolls down the mountain trapped inside a snowball. Contact with monsters slows you down. The smaller the snowball, the faster you roll. Collect snowmen to make the ball bigger and flags for more time. Eventually Max collides with some bricks at the bottom of the mountain and he's free!

LEVEL 8

The final climb is in Donkey Kong style. Look under rocks for extra time and collect the worm creatures which sneak on from the left. These are ted to the chicks, and that's the game wrapped

CodeMasters

The Phantom Faxer's probably not a phantom at all, but a simpleton who likes dual identities. Never-the-less, the Sergeant Seymour — Robotcop cheat he sent should help those in need.

Load the game and when the titles appear type STEGTHESLUG (no spaces). The border will change colour and low and behold, infinite lives are yours.

Gremlin

Simon 'thirty-something' Swaby from Lincolnshire's been playing this alien encounter for hours on end, and during one night of hectic rolling (die rolling of course) he stumbled across a cheat which, he believes, is quite stunning. I happen to agree Simon, and call me insane if you like but I'm going to print it!

The Assault Cannon's by far the best heavy weapon. Follow these rules and the soldier carrying it becomes a one-man army

1) Get a re-lire by whatever means necessary (shooting at the most powerful target visible is the best way, you never roll enough!)

2) Once on re-fire, place the cursor on your own assault cannon (make sure you've got the right mant) and press fire, this resets the roll of the dice.

3) Choose an enemy and press

fire, both dice will re-roll (the cheat is now activated but place the cursor on your own man's square between firing to be sure)

If you roll double zero or use up all your shots, you should now find the Fire icon is still active.

 Every time you click on your own assault cannon and then onto the enemy, both dice will re-roll and the Fire icon stays lit even when you switch it off (active and reselectable)

N.B THIS WORKS FOR ONE TURN ONLY, IT MUST BE DONE ALL OVER AGAIN, NEXT TURN, IF NEEDED.

Now all you need is patience: everything you shoot at dies hombly. It's best to activate the cheat before moving. Remember that not getting a re-lire turns the icon dark. Once activated, choose a position from which he has the most devastating field of fine. Simon says (no pun intended) that he cleared a room of all nasties in one turn but it does take ages, so persevere

The best mandeuvre is the Immelmann Tum Spin-This is very good if enemies are hassling your behind just remember to increase the throttle to maximum — if wacks up the EMV and gives you the needed lift.

Try to get behind the opposition when fighting. head-on attacks aren't advisable because you're as vulnerable as they are

Heavy turbulence is encountered If the Stealth flies at low altitudes

GENERAL TIPS

It's best to eject over sea or friendly territory at 2,000-4,000 ft.

WEAPONS

Cannon: Short range but easy to aim - just line up and tire

Air Air Missles: Both the Amramm and Sidewinder are good fire-and-forget missiles. The Amramm's probably the best of the two as it has a longer range

Mavericitist These are slow but are definitely the best air-to-ground missiles

Air-Sea Missiles: They're all pretty good. You get more penguins than harpoons but the harpoons have a much better range.

Bombs: Undoubtedly the best bomb is laser guided, the Rockeye 2: When using the smart bombs (laser guided) always remember to toss bomb them, or the target will be missed.

Tusker's been needing the Tipsters attention for quite some time now because Daniel Pagett from Powys has been pleading for advice, along with Midlander Becky Dixon. She too wants help with the elephant related outing. Nothing annoys me more than people phoning me and asking for game tips, but one polite gentleman sounded deeply upset as he explained his Tusker problem. so here's the solution for you all,

Collect the necessary objects from the desert gun, ammunition (found in large box), acid bottle, knife and the water bottle

Get the key from outside the village and then enter that section. Walk through the hut to the left of the bounding skull screen. Exit via the top corner and traverse through the inside of the village to the screen with the locked hut. A medicine bottle awaits collection. Go into the large huts through the door with the face above it. Move right collecting sling shot and matches in the alter room. Use the matches and punch the idol to burn it. Grab the orb using the punch movement. Enter the screen to the right of this and give the medicine bottle to the angry witch doctor (again use the punch movement). The chief will now stand up and you will see a key in the objects part of the status area. Exit the village and give the key to a native in the screen containing the sliding gate. Pass through the open gates, and it's on to the final

Collect the small gold nuggets found on the start screens (seven in total). Use the sling shot on the dinosaur before nabbing the nugget. Enter the cave in the side of the mountain and move right to reach the temple. Punch the monkey with the nuggets to make it move back Collect water in the temple by a punch movement on the statue. Kick the door on the insect screen to release a spider. After the insects have disappeared, collect the icon on the floor. Pick up the object in the plant room (the plant can't be killed) and collect the hammer, chisel and plank from the next screen Hit the alter in the room with the mummy using the hammer and chisel and the lid opens revealing a brown icon. Collect this with a punch and walk into the room with the empty table. Place the icons on the table in the correct order they can be picked up again it incorrectly placed. Eventually the combination will be right and a door will open allowing access to the final screens. Put the plank across the chasm by crouching down. Walk over the plank and place the gold nuggets on the scales to stop it moving, the final door will open and the game's completed

And if that STILL isn't enough, this cheat will throw you onto the last screen with all objects in your possession.

On any level move to the screen right of the one after the first load, and walk to the bottom Press fire on the joystick in Port 1

BEATLE QUEST

Number 9 Software £4.50 cassette/disk

his adventure (written on The Quill) has nothing in common with the creepy crawly type of BEETLE, but an awful lot to do with legendary pop group THE BEATLES. For those too young to remember. The Beatles were the most popular band of the 1960's.

wherever they went and later becoming the first band to be awarded the OBE. Sounds like a good theme for a game...

Beatle Quests a large adventure, with around 150 locations. After the opening scene (set in the Mists of Time), you wake in a seedy bedsit in the heart of Beatle Town. You scon find yourself taking a bus to Penny Lane (hope you have as much fun with the sheep as I did)(come again?—Ed), visiting the old school, taking a trip to the circus, riding on the helter skelter and visiting many more weird and wonderful locations (recognise 'em, pop pickers?).

A must for Beatles lans, perhaps it's a little tricky for younger adventurers as all the puzzles, plots and counter-plots relate to Beatles song titles and lyrics. Most of the location descriptions are taken from Beatles lyrics, and a knowledge of their extensive range of hits is almost assential to completing the game. Featured songs include When I'm 64. Yer Blues, The Continuing Story Of Bungalow Bill, With A Little Help From My Friends, Love You Too, Strawberry Fields Forever, Lucy In The Sky With Diamonds, SGT Peppers Lonely Hearts Club Band, I Am The Walrus, Penny Lane, Glass Onion and The Fool On The Hill. Getting

into the game's extremely difficult at first, as after the first few moves two of my most dreaded hates reared their ugly heads — being told I'm hungry and the evil Sudden (and illegical) Death Syndrome, the bane of bad adventures. You only have a few moves to solve a particularly nasty

particularly nasty
problem before
'Maxwell's Silver
Hammer comes down

Beatles lyrics). This
puzzie's so bad I'm going
to break my own rules

and and print a clue within a review, albiet backwards. In the MOOPHTAB, you must MOOP HCRAES to find an item which (and don't ask my why) keeps death away. There's another sudden death in the bedsit, where you find a beautiful girl sleeping. I couldn't find much to do with her, apart from something rather naughty, for which I got killed! Serves me right I suppose, but when you're stuck you should try everything.

The need to ear comes into play after very tew moves. You're told you have 'the hippy, hippy shakes' — doing something unusual to the telephone should help you out there. If you do averything right within the allotted number of moves, you'll soon. Picture yourself in a boat on a river, with tangerine trees and marmalade skies' it's from this point that the game opens out.

First released way back in 1985, it's now been re-released by author Garry Marsh of Number 9 software. Garry's obviously a real Beatlemaniac and there's no denying a sound knowledge of Beatles lyrics helps the player no end, though I only know a few myself and I managed to complete it eventually. I've mixed views on the adventure as a whole. On one hand I enjoyed parts of it very much indeed, but on the other, two sudden death routines right at the start and the limited number of moves allowed to sort out the problem almost made me throw it through the window! It's a tough adventure, and because of the Beatle theme it could prove a lot of harder for non-geriatric adventurers. However, if you young 'uns want to see how we oldies cut our adventuring teeth way back in 1985, then try it!

Since the dawn of time mankind has dreamed of flying! For some the dream became reality - MILES 'AND THE WORLD MILES WITH YOU' GUTTERY reaches for the sky...

gh was a happy man. He lived in a tasteful middle-class cave on the better side of the mountain and enjoyed a contented existence. Contented, that is, until something terrible happened — he fell in love! No longer could be spend his days lazing around the cave or clubbing passers by. With love comes responsibility. and sure enough the light of his life was soon demanding a new washing machine, vacuum cleaner and dinosaur-skin rug (women, eh?). Not wanting to lose his new found babe, there was only one thing for it - he'd have to earn some money!

In prehistoric times career opportunities were very limited. Undaunted, our entrepreneurial ancestor came up with an ingenious scheme to nustle up cash. Noticing how his lazy neighbours hated walking, it occurred to him that if he provided a transport service (for a small fee of course) he'd clean up. All he needed was the right vehicle for the job!

You take the role of Ugh and control his contraption, helping as many fellow cave-dweller as possible. Be quick though — if you leave then hanging around for too long they won't pay.

Even on the early screens the helicopter's trick enough to fly due to the heavy inertia it generates Later things get seriously hair-raising as the computer throws in various dinosaurs and obstacles to hinder your progress! Feddling's tiring work, so keep your energy bar topped up by dropping a boulder on the trees and munching the fruit it dislodges.

When you cast your eyes over Ught, first impressions are very commendable. But even though the graphics may be detailed, (the shimering water effect is fantastic) play soon becomes very frustrating. The most sensitive joystick movement is required; thrust the stick around and the propelled elevator careers through the platforms into the water. This would prove challenging but later levels are beyond comprehension — time a dive Wrong and you're stuck underneath a ledge waiting for the caveman's energy to run out. reception followed. It's an original idea, but it's hindered by some seriously frustrating gameplay — one small slip can mean having to start the screen all over again! Thankfully a handy password system's included, avoiding repetition of screens. Nevertheless the office Commodore did well to withstand a verbal battering that was (to say the least) very heated!

If you're looking for a game that takes time to complete, then Ughi certainly provides

a stiff challenge. Those with a low trustration threshold should think seriously before they buy.

Ugh! could've been a HURRICANE HIT, but

It's seriously marred by appalling presentation and gameplay flaws. For example, if you hit a platform too hard you die — fair enough, but why do you fly straight through it and disappear off-screen, which then flicks to the intro page? a small explosion wouldn't have gone amiss. Also, when you run out of energy the screen also flips without warning, or any indication of what's happened. This may not sound too annoying, but believe me it is — it gives it a faity, unfinished look.

Worst of all ist the horrendous, insane difficulty level. Your energy runs out so quickly it's untrue! To make matters worse when your bomb a tree to get fruit it often bouncers off the screen, and even if it doesn't your have to be damned quick to get to it before it vanishes!

pieces accessed through level codes is a neat idea, but apart from that it's just more of the same.

Dizzy Seymour arcade adventures have always been pretty similar, but up 'till now they've always taken the genre one (small) step forward. Prince Of The Yolk Folk was as large as it could possibly be. so the Codies wisely concentrated on their new level system and better graphics with Crystal Kingdom, Wild West Seymour's a step backwards — a shameless Speccy port, it runs almost as slowly as the early Dizzy outings, and the problems... solve one, you've solved "em

If Codies arcade adventures are to excite again, more attention must be paid to the design. Let's have a more involved manipulation system, one that allows you to use objects in your inventory on each oither. Let's have more complex problems, not just bog-standard ones. Above all, let's have a bit more depth. Part of Dizzy/Seymour's

charm was it's simplicity, but having been done to death it's begining to grate. Maybe it's time for a change of

environment in Super Seymour and a short lived career moonlighting as a policeman in Sergeant Seymour - Robot Cop. Seymour's back where he belongs - in the movie biz! His latest project's a sprawling western, but (as usual) production has run into a plethora of technical hitches before it's even begun. Most of the problems are down to the devious tricks of the evil El Bandeeto who (for reasons best known to himself) is determined that the film never makes it to general release!

The flendish villain's thrown the studio into uproar! No one knows where the script is, and worse still important equipment's been hidden or mislaid. To make matters worse the film crew have gone off to search for the missing items, leaving poor old Seymour to sort it out on his lonesome! One or two of the studio staff are still hanging around, such as Claire the receptionist and Pete the camera-man - they seem to have problems of their own, but help them out and they give you a useful object or a clue in return. Having rectified the turmoll at HQ it's off to the States to begin shooting (the movie, silly)

Train Of Thought

On to act three. The evil El Bandeeto's sabotaged the train (What a rascal he is, eh?), leaving Seymour stranded in the desert! Cue more puzzle solving and careful exploration of scenery.

After getting the train back up and running, our hero finally makes it to

the final section - the film shoot! When Seymour first appeared it seemed he was to be Dizzy's successor as Codie's standard bearer. After a couple of simplistic but playable arcade outings and an interior Dizzy-esque arcade adventure, his credentials aren't

His world is graphically dull, and to add insult to injury his latest starring roll is a blatant Spectrum port that makes no attempt to utilise the superior colour capabilities of the C64. Unlike Codie's earlier arcade outings, Wild West Seymour's

made up of four stand alone sections accessible by a rather spiffy password system: Having completed a section you don't have to go through the rigmarole of solving the same old puzzles every time. In this respect the game borrows from the recent Crystal Kingdom Dizzy. The essential difference is where each of

e Now that Seymour's off the waggon, does it mean he'll be getting Dizzy? (Sorry!) CKD's levels is a respectable game in it's own right, the sections in WWS are tiny, only tento fifteen screens long! This

means they're laughably easy, making Wild West Seymour a complete non-starter in the lastability stakes...

WWS was initially sold as part of a compilation and as such was okay to wile away an hour. As a release in it's own right it really is a disappoint-

ment. I usually find this style of game highly addictive and very rewarding to complete, but the only feeling I had on completing WWS was immense relief that I wouldn't have to play it again! Strictly B-movie

QIII Q

Codie puzzle/arcade games would look different to the Spectrum versions, but low-and-behold they don't. Wild West Seymour's no exception — the graphics are stale and watery, especially the main sprite, and 'attention to detail' must've been erased from the menu. The puzzles are quite tame, each needing little thought, and after a few plays it's all sorted. The majority of time's spent judging Seymour's leaps! If only he could change direction in mid-air, I wouldn't have swore half as much! There's a remarkable resemblance to a certain egg-shaped character, but the yolk's adventures are far better in content. Seymour's home ground should be on a

compilation, but in the vast universe that is the C64 market, as a stand-alone game it'll struggle to gain friends.

Who can deny the positive cultural effects Sky TV has on our green and pleasant land? Such delights as Danish 3rd division soccer, The Simpsons and of course that wonderful (and totally unchoreographed, honest) dancing spectacle known as WWF Wrestling! MILES 'OIL MOIDA DA BUM' GUTTERY grips his grapple and takes on allcomers...

remember Big Daddy and Kendo Nacasaki. The goody and the baddy — you knew where you stood with those guys. Suddenly, though

wrestling's acquired something it lacked in days gone by - heaps of hype, inspiring a legion of Tshirts, videos, slippers, bog rolls, you name it! The stars of the 'sport' even recorded their own single (number 4 in the charts at the time of writing). The big question I can't help asking is if these huge muscle-laden prannies are so damned tough, how come they go down without even hitting each other? Watching too many Frank Bruno fights I suppose...

After Ocean's excellent officiallylicensed release, the Codies have jumped on the bandwagon with their own computerised representation of the sport. For maximum realism the game comes complete with a jar of false sweat to rub all over your body, a vast amount of jewellery to ponce around in during pre-bout interviews and a generous helping of Patel's 15megaton nuclear curry to give your voice that rasping macho tone. Actually that's a lie, but the game does attempt to incorporate most other essential elements of this great American institution. There's the incredibly condescending and excitable commentator (who bears an uncanny resemblance to Ronnie Corbett), a range of mouthy and unpleasant opponents and the obligatory slanging match prior to the fisticuffs.

You Grunt, I'll Groan...

On to the fight. The player has a number of moves available to him. A punch (very weedy), a kick (slightly better) and if you run very fast against the ropes you can bounce off and give the other guy a right thraping in the head (well smart). You can even climb onto one of the posts at the comers of the ring and jump on him! Occasionally you get into a grapple, and then it's waggling time. Shake the joystick left and right like mad in order to lift your opponent above your head, then press fire to chuck him to the ground. When he's down, jump on him and try to stop him getting back up. When he pins you, waggle again to throw him off. Each wrestler has an energy bar, depleted when hits are sustained — the lower it gets, the less chance you have of breaking a pin

Fight games are almost invariably better when

6 Okay, so this shot looks like an outtake from a dublous Swedish video but then so do half the wrestlers!

 The Ring Master death-defying (inducing?) le seems likely to impress the ref... who looks disturbingly like Ronnie Corbet! played against a human opponent, so it's curious that the programmers have neglected to include a two-player option. It's true that the number of moves

is limited, but I personally didn't find this offering quite as dire as the others did. OK, so you feel like your arm's going to fall off after the second bout (the waggling is lack of head-to-head action's a bit of a slam in the solar plexus. Even so, if you're looking for a wrestling game and can't afford WWF then Wrestling Superstars is alright for

Gone are the days of TV wrestling OF Saturday afternoons. The cumbersome Giant Haystacks using his perfected buttock-press on the equally large Big Daddy, and the placid commentary of Mick McManus — Oh, what a beautiful half Nelson'. I never knew what a full Nelson was, let alone a half one. Grappling these days is a much hyped affair, owing more to glam rock and mime artists than anything else. It's painfully obvious that Wrestling Superstars is trying to cash in on the vastly popular 'sport' from America, but competing against WWF will prove a hard fight, especially when so few moves are included. What really kicks it in the turnbuckles is the amount of joystick waggling required. All in all, it's a shot of steroids in a

Nowadays it may be a certain Iraqi dictator's hide-out, but long ago Baghdad was a mystical place. While Sinbad tackled one-eyed ogres, wealthy kings regularly held parties in honour of themselves — CHRIS 'SHEIK HERDER' HAYWARD visits John Menzies to find the ruler...

he air of Baghdad is tinged with excitement, all noon, you (the ruler of the city) must hold high the legendary sceptre, so claiming your right to rule over the land and its people. Of course, ceremonies never quite go to plan, especially when an evil wizard plants monsters and beasties all around your castle in an attempt to stop your public appearance and tries to seize the sceptre for himself.

Because of oil wizzy's interference, Baghdad's all of a dither. For starters, everyday objects have grown in size — some even gained a life of their own! The only way to undo the wicked one's work is to

A conversion of the ancieni Speccy game of the same name, Sceptre Of Baghdad casts you in the roll of a distinctly stout turbam-clad chapple. Yomp around the fillick-screen landscape. collect objectss, solve puzzles, hitch a ride on a magilic carpet, eat your shorts and don't have a cow! The crux of the game is finding the right place to put each object, and this is where the game falls down. Sorme of the puzzles are far too obscure. clean up the city using your wit and intelligence (your what? — Miles), which basically means collecting objects and solving problems in the usual arcade adventury manner. By combining items different results occur, such as waking a helpful genie or revealing a hidden room. The monsters you encounter also need taking care of but the slaying can't commence until the correct items are found. Medusa can only be destroyed using (deleted — no clues here — Ed), but you need to complete a bonanza of puzzles before it can be grabbed, and so on. Tidy up the city, degiblet key monsters and the sacred sceptre ceremony can go ahead as planned.

Dated Dealings

Sceptre Of Baghdad was originally released on the Spectrum in 1987, so it's inevitably dated a bit since then. Still, if it needed tweaking it couldn't have been tweaked better — the sound's nothing short of outstanding, with several different melodies moodily setting the almosphere. The graphics are bright and colourful, but I got an uncanny feeling of deja vu. The energy status resembles that in Sabre Wult, the ancient Speccy game, and on many a screen I cringed at the nightmarish Spectrumy sprites. The central character's questionable, looking like a Rastatanan with no style, and the animation's also puzzling—the Caliph swings his arms and slides across the floor like a curling stone on concrete!

No matter how bad other factors fare, playability must shine through, and yes, you know what's coming next — the playability is quite sad. Now don't get me wrong, these

exploration/collect 'em up games usually entertal Searching untouched territory and solving complex problems proves tun, but only when the problems make sense. A lot of items aren't actual used as such, just swapped for other objects. This fine when using the insect net on the spider, by who in a same state of mind would think of swapping a coconut for a mirror or exchanging a carpet for pair of slippers? (We'll let these pass — Ed)

It's this impossible predicament that opens a gaping wound in the belly of a possible winner. Salt's rubbed into the festering sore by the whimsical amount of lives you are given. Dying when 80% of the puzzles are solved inspires screams of trustration, and with only one restart point (incidentally, I couldn't find if anywhere) exploration soon becomes a choire. Anyway I may as well try and finish it—of, dear, I should have swapped the armour for an egg whish.

Hudson and Halls - terrible twosomes are always popular (apart from Hudson and Halls, who are just temble), and in this two player outing the lead players are a dwarf and a bird The bizarre couple like to rendezvous at weekends and meander around a castle gathering. treasure and shooting horrible creatures that might hinder their fun. They can walk round by themselves (which is where the split screen comes into action) or team up, a map of the castle taking over the lower screen.

Now the plot's out of the way (incidentally, that was the extended version) the critical onslaught can begin. Two player escapades usually provide a laugh no matter how disgusting the gameplay. but all Dynamic Duo deserves is pitiful sorrow

The Dwarf resembles a slumpy Santa Claus, dawdling around like a sedated impet. The flying duck zooms straight into oncoming nasties (il you can call green hoops nasty) with it's firepower proving as much use as a rhododendron. The most atrocious aspect is revealed when a player dies. At first I thought the program had crashed; the screen intertwined with black and white lines flickering across, trying to represent some kind of thermal meltdown. Believe me, thermal pants hold more appeal. Who on earth had the idea that a dwarf and a duck would make a formidable team? Dynamic Duo indeed — it's a creeping mass

avage is a typically average hunky lantasywarrior type. Muscles in all the right places, but mostly between his ears! His woman's been captured by a particularly nasty man and is now held prisoner in his castle. Being the sentimental so-and-so old Sav inevitably is, he sets out to rescue her. It must be love! To make things doubly difficult Sav himself has been caught and locked up, so his first task is to escape from the castle dungeons. Easier said than done! The dank corridors are home to hundreds of nasty little creatures. Bats, little dragons, flying insects, all with one aim in their minuscule minds - to make our hero's pants resemble a sewage recycling plant! Occasionally more formidable enemies appear who, when defeated, drop better weapons to aid Sav in his escape. The nearer he gets to freedom the more fraught the situation becomes. And as well as avoiding or killing the nasties there are bottomless pits and pools of fire which must be negotiated.

Hurry Up Harrier

Once out of the castle Savage does what any self respecting super hero would do. He demonstrates a super sense of self preservation and legs it. Maybe he's not not so dozy after all! This leads on to level two, where we're presented with a barbarians-eye view of the action as the man himself runs (at an astonishing speed) from the castle, dodging strange monoliths and shooting the odd baddle.

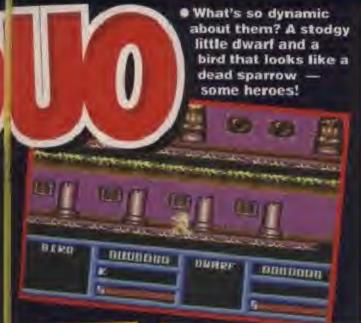

This bit owes more than a little to the age-old Space Harrier but without the sprite (or the

So it's on to level three. where you guide the eagle through the traps and nasties before locating the girl.

All three gamestyles have been seen before Level Two's basically a 2D Space Hamler, level Three plays like Airwolf, and the runny/shooty formula of level One's been done countless times! Difficulty-wise the game's pretty hard, making for more lastability in the long run but leading to frustration for the first few plays. raditionly a game review starts with the plot. Being a lettuce for tradition this one's no exception, so here goes (deep breath).

The world, it seems, has a bleak future. With it's energy sources rapidly running out, a number of starships are launched to seek a new home for the desperate population. As usual with these kind of voyages, a formidable alien power decides to be awkward and nick the ships for scrap! Unsurprisingly narked, the colonists decide to act - do they send a huge battle fleet, armed to the teeth and carrying thousands of troops eager to board the alien vessels? Tish! Why waste all that time and effort when one man and a pifflesome little fighter can do the same job? You've guessed it. that man's you and Hades Nebula's another vertically-scrolling shoot-em-up jobble (sight) ...

SEUCK to kill...

All the essential elements of the genre are here extra weapons, collectable shields, hordes of badly drawn enemies, etc. This is all well and good, but what happened to the speed? The aliens ettortlessly drift around the screen while your own weedy little craft's virtually static! Speed power-ups can be collected but they're lost when you die, and you die very quickly! This one fault kills the game stone dead

Yes, the sprites really are that bad. The backdrops aren't too pretty, either! it's almost impossible to get anywhere! It's a pity really, as it's got some good ideas. For instance when you collect a power-up it visibly attatches itself to your ship making it look very mean indeed, but what's the use of that when you've the life expectancy of a Spectrum mag?

oreak, and he's taking the leading role in a new megabucks movie. Trouble is the director's gone

on holiday and left the movie scripts locked in his sate. It's down to Seymour to get the carrieras rolling himself but he's going

to need help. Some of the people he meets around the place muck in but others are just a nuisance.

If you've ever played a Dizzy adventure (and if you haven't, where in toasted-cheese-sandwiches have you been?) then you'll have a pretty good idea how Seymour Goes To Hollywood plays — wobble round collecting objects and dropping them in the correct places. For some inexplicable reason the programmers have seen fit to incorporate a very strange maze element in the studios section — it's all-too-easy to get hopelessly lost unless you painstakingly map every single step! This can be incredialy

trustrating and sent me diving for the reset button a couple of times, so be warned and have a pen and paper handy.

Graphics are drap and sometimes a little llickery, and the screen update's virtually paralytic However, it's still reasonably playable and a dozen times better than Seymour's other adventuring effort

SERGEANT S ROBOTCOP

irst up we see Seymour dabbling in the world of Law Enforcement. In a seedy city of the future where crime is rife and the streets need cleaning up. Robotcop's a villans worst nightmare! After a terrible accident allooked to be lost for the lardy one, but (as the taying goes) 'We had the technology to rebuild him'. Now the inimitable tumip's back, backer, faster and tougher than before! With his new-found blonic powers he must run round each single-screen maze, duffing or arresting the baddles. This is done (very satisfyingly) by grabbing them with his extendible bionic arm and hurling them against the walls. Get rid of them all and

you've busted that level's Mr Big, but be quick
— he's producing more henchmen all the time.
There are lots of collectable power-ups to be
had, such as a bionic arm extension, bullets,
fireable handcuffs, smart bombs and the like, all
of which enhance Seymour's crime-busting
capabilities.

This is a real throwback to the old days of computer gaming. No sampled sound, no work-of-art sprites with fifteen frames of animation per limb; just compact, uncluttered playability (Steve says it reminds him of an ancient arcade game called *Berserk*, but no-one else in the office is old enough to remember it). Simply moving a poor sprite around a simplistic maze

may sound seriously
liresome, but all I
can say is play it
and then judge. Jolly

STUNTMAN SEYMOUR

aving previously been the star of his movies, Seymour finds himself pining for a little more action. After some serious workouts in the gym, he emerges looking sleeker, smoother and nothing like the lardball we have all come to know and tolerate.

Now he's ready to swap the trappings of stardom for the thrills and (mostly) spills of being chief stuntman on four major new pictures. His job is to make it across each film set in as few 'takes' as possible, by leaping across platforms and avoiding the bad guys, making the most exciting action sequences possible.

The 'stuntman' theme's just a thin vell for a another platform shooty, a shameless CJ clonel Change the main sprite and no-one would know the difference. Not that that's a problem though. Graphics are clear and attractive and the eight-way scrolling's very smooth. Most importantly the game's great fun to play and the difficulty curve's pitched just

right. This is one that'll keep you coming back for sure, and just beats Super Seymour as the best game in the pack.

SUPER SEYMOUR SAVES
THE DIANET

eymour turns green, and it's not cos he had too many pints of lager the night before either. He's actually become afflicted with that most depressing of ailments, environmental awareness!

The world's in a heck of a state. Everywhere you look there's canisters of nuclear waste, piles of discarded rubbish, not to mention the mutated nasties who have grown up amongst the filth (sounds like the COMMODORE FORCE office). This is clearly a job for Super Seymour — faster than a speeding cow, braver than an anorak, and

a dedicated cape wearer to boot!

Leaping from platform to platform on each screen, dispose of all the toxic waste and destroy the mutants by leaping on them, belly cutting them from underneath, or simply touching them and scarpering before they

explode — though tricky at first, you soon get to know which baddies need bashing in what way.

The game makes absolutely no bones about being a virtual carbon-copy of that old classic Bombjack but, as with Stuntman, why tamper with a winning formula? Seymour himself is back to himself old podgy state but leaps about the screen with an ease unbecoming of such a porky personal Each level has an attractive background giving an overall cosy feel and gameplay is both engaging and challenging.

Conclusion

Two great games and two good games make Superstar Seymour a well-worthwhile buy, despit the obligatory duffer. Okay, so everything here's been done before — sometimes better, sometime not, but who cares with this kind of value? Search if out, you won't be disappointed.

E'S REALLY

Dear Sir.

I am writing to you in the hope that you can help me find translation listings to turn C64 assembly language to machine code. People in shops look at me as if I'm speaking Swahili and I usually get the reply 'you don't need that sort of things for playing games'. At this point I leave the shop before lecturing them on mnemonics. I'm on bended knees pleading for help, and I'll do anything (anything? — Brian) to get this info. Roger Corker, Maidstone, Kent

Calm down a bit Roger and I'll give you th answer; don't try high street shops for serious 64 software, just write to Binary Zone PD at 34, Portland Rd, Droitwich, Worcs WR9 7QW. Ask them about the 6510+ Assembler, a program that turns assembly language into machine code and a lot more besides.

 Congratulations on buying the best home computer on the market and the best magazine to go with it! The C64 is one of the easiest computers for beginners, and it's always nice to

help new owners, so here goes. 1. Turning your computer on and off is the BES way of getting ready to load a new game. Turn the machine off, leave it off for several seconds then turn it on again. This ensures the memory clear and gives you less trouble. With cartridge ONLY REMOVE OR INSERT THEM WHEN THE COMPUTER'S TURNED OFFI You could seriously damage the cartridge or the computer

you don't follow this advice

2. RUN/STOP and RESTORE are special keys that most of the time are only used when programming or running BASIC programs. Unless the program's designed to return to a menu or title screen when these keys are pressed, don't press them while commercial software's running. Most of the time,

RUN/STOP's used to pause the action, wherea RESTORE's used less often because it interrup everything the computer's doing and and can cause the program to 'crash' (a computer term 'stops working')

3. Monitor leads should work with the two outpi from the computer, so look in your local electronics shop (eg Tandy's or Maplin) for a fiv pin DIN plug to 3.5mm Jack lead. It shouldn't co much, and your picture/sound quality will be

slightly improved.

Needless to say I swiped it back when he wasn't looking, but I think he found out as I stealthily crept from the office, I heard an almighty crash followed by a blood-curdling screech (onomatopoeia - LMLWD) - our beloved leader had fallen off his chair (which was wobbling once more), and landed on his head.

ROLE REVERSAL

I'm an avid C64 role-playing addict. Will US Gold ever complete one of their AD&D series on this format? I've been trying to get Secret of the Silver Blade for over 18 months. I've phoned US Gold who said, 'Don't worry, it'll be available in a compilation. That was twelve months ago, and to my knowledge if has yet to appear

I originally bought Pool of Radiance. Champions of Krynn and Savage Frontier on the understanding that I would be able to to purchase and complete the series on the C64. To my knowledge none of them have been concluded

I feel that myself and hundreds (maybe thousands) of others have been conned by US Gold. I hope that you can find out what the situation is. I get the impression they've lost interest, which suggests they're dropping RPG games on the C64. I hope I'm wrong!

A Wood, Doncaster, South

According to the person I spoke to, Savage Frontier was never released on the C64. Secret Of The Silver Blade never will be, and the only other available is Death Knights Of Krynn. Sorry! MISTAKEN IDENTITY?

Dear Commodore Force

Do you realise what you've done? You've given the greatest 64 mag in the world the same inititals as that heap of cats vomit they dare to call a magazine — you know the one I'm talking about How could you do it?

Right, now that I've got that off my chest, here's a few questions for you:

1) What is the best icon-driven game for the 64?

Dunno, but Shards of Inovar on this month's

REEL ACTION's pretty good.
2) I notice that Software City had Parasol Stars in their list and I guessed you'd review it shortly. Alas, there's been no review and it's not in Software City's list anymore — what is going on? The game's been delayed indefinately 'cos

the guy who was programming the C64 version had his computer nicked, along with all the code. Adverts are placed long before a magazine hits the shelves, so Software City probably assumed (not unreasonably) that by the time you read the ad the game would be

out. The rest, as they say, is history.

3) Infocom are long gone, so where can I get a copy of The Hillch Hikers guide? Perhaps you sould put it on the covertable

Look around. Infocom games are as rare as ZX81 owners, so you'll have to look hard! Finally, we can't put it on the coverlape because (if my memory serves me right) it was disk only.

PS Welcome back Lloyd!

Cheers!

editorial

Dear Commodore Force, Having read issue One of your Illustrinus mag, I thought I'd drop a line with a few thoughts on the at C641

I'm old enough to have watched the home computer boom grow from the early days. marvelled at Skramble (slc) and Frogger on the ZX81, blew my mind with the BBC 'B' versions of Planeloid and Snapper, and was awestruck by Attack of the Mutant Camels on the C64 at the 1983 Your Computer magazine show (remember them?)

Things have changed since then, with some good computers like the Memotech (very advanced for its time) and the Sord M5 never making it, and some right lemons like the Mattel Aquarius and the MSX range flopping dismally. Throughout it all the C64's soldiered on.

and it's probably the last of the early 8 bit computers still around. Sadly though, if appears to be suffering now. This seems to be more due to the fact that software houses have given up writing for the old girl rather

than anything else, but alas, those wretched consoles have a lot to answer for.

People seem to have forgotten what it was that killed off the original big league consoles, the Atari VCS and the Mattel Intellevision. It was the way both Mattel and Atari had a virtual monopoly on writing the cartridges for them and charged extortionate prices - even in 1980, £30 for Space Invaders was a lot of money! Home computers allowed ANYONE to write and publish a game, and at a decent price too. A good game for the

First of all, to input pokes you need a reset cart. They don't make ordinary ones any more, but Datel's Action Replay Mk VI does this and much, much more - they're not cheap at £35, but they're worth it. As to your other question, mentioning that Initating, flea-riddled blue monstrosity is more than your letter's worth, but as you're naw to computing I'll refrain from chucking it in the cylindrical filing cabinet. If there's anyone out there who doesn't know the score regarding Sonic, read my autro. Any further correspondence on this subject will be seriously laughed at by everyone here at Commodore Force.

Don't you mean 'tutorial'? Anyway, what do the fans think? Would you like a training session with Brian 'you're 100%' Strain? 3) I'd like to challenge someone at Subsonic

And I'd like a pay rise thank you!
4) Is Chips Challenge still available? If so,
where from? How much? and how did you rate it?

Alas, Chips Challenge has been substituted — It couldn't be for putting in a poor performance as we all thought it was great, so hopefully US Gold will transfer it to Budget Label United pretty soon. Long live the Force

R Ford, Midhurst, West Sussex.

All this footballing fun and not a singly dodgy remark about balls — the ghost of Whiplash has finally been fald to rest!

C64 would cost about £6.90 in 1983, whereas Atari and Intellivision still wanted around £30 for one of their interior cartridge:

Now we find consoles ruling the roost again. We see extertionate prices (C49 for a game) for artridges which are strictly controlled by console manufacturers. Note how games like WWF and Bart Simpson are NOT available on cartridge for any system other than Nintendo, because Nintendo hold the licence to them. Notice how few lif amA independent software houses are able to produce console games, leading to the monopoly situation again.

isn't it a big con that most consoles can be bought for under £100, making it very attractive to Mummy and Daddy compared with

those nasty expensive computers, but then they have to pay up to £50 for a game when they could have bought a C64 and paid much less (£2,99 to £12). Buying a C64 makes financial serise from day one. Sooner or later people will discover the delights of a wider range and cheaper switware on computers and see the consoles in their true light, just like they did in 1983. Until then we can only

blame the sallware houses for shooting themselves in the local, using the slightest excuse in gut up the price of 116-bit software so it's almost the same price as carttridges. Only 8-bit games are significantly cheaper

I hope consoles get the fate they deserve, ie selling for a fiver at carr boot sales, and people realise what a manipullated and strictly controlled

I purchased your mag for my grandson, and I must say that I've never been so appalled at the quality of the covertapes. They were supposed to contain games etc but all we heard was a dreadful noise! I am returning one of the tape: to you for your comments. Hopefully you can give me some explanation, and eithe replace the tapes or refund the money Yours faithfully Mrs Imlah, Tamworth, Staffs. No, you can't be serious! This can't be a genuinely agrieved reader, it must be Steve playing his April Fool joke three months early - I mean, no one could be thick enough to put a computer cassette into an audio unit... could they? Are you sure this isn't down to you, Shields? — 🛂 For the benefit of Mrs Imlah (and anyone else who hasn't two marbles to rub together) our

covertapes are for Commodore 64's, and the 'dreadful noise' you heard is actually a

computer program! What sort of games did you expect? Ring-a-ring-a-roses? Simon Says?

Anyway, congratulations on winning this month's pilchard — without a doubt, yours is the funniest letter we've ever had!

con they are. I hope I don't have to show many more people my C64 and get commente like Waw, I didn't know games were so good on these to prove their interiority

With regards to the C64, is it really a dving breed? Are spilware houses really giving up on it? There's centainly been a marked decline in the number of games released, but will this continue? I don't know what the future holds, but it'd be a shame to see the C64 die in lavour of consoles

Yours Mr Clerk Denham, Watford, Herts

The MSX? No good? I can't agree, I thought they were okay but badly marketed. I couldn't agree with you more about consoles being restrictive, monopolistic and too bloomin' expensive, thought Nintendo, for example, have vetoed cartridge releases of WWF on any system other than their own, and it's even been suggested that they've tried to stop publishing companies releasing magazines for Nintendo users!

As for your final point about the C64 market dying in favour of consoles, rest assured It won't happen. Console owners may have a huge range of carts to choose from, but most of them are bog-standard shooters or platformers - all the imagination and innovation comes from the home computer scene. Console-mania is a passing lad that'll soon be as obsolete as the Hula Hoop or flared trousers, and the Beyond Belief feature in ish 1 should allay all our fears about the death of the Commodore market.

DISK-USTED

To Commodore Force,

Well, after several letters (none of which you answered or printed) I thought I'd give it one las go to see if you guys really do print reader's left instead of making them up!

A while back I sent you a disk containing a game for your covertage. 104 pokes for all the latest games (for which I thought should be won the cart, but you didn't use them) and some dem from European groups. Why didn't you use then You didn't like the game? Too many pokes for yo Please answer these questions or I'll stop

getting your mag. R Marshall, Great Yarmouth, Norfolk

Erm... er... ahem! Sorry about that! The problem is no one in the office knows anything. about it, so we can only assume your disk w lost in the post. Feel free to submit it again (hope you kept a back-up copy), but as for th original, there's nothing we can do.

C-FORCE No.3 MARCH 199

Dear Commodore Force

Please, I beg you! Please, please could you release Street Fighter II on cartridge for the Commodore 64?

Please, please because I think it will be better on cartridge. So, please, please don't say no! Please,

I am willing to pay £20 for it.

So please write back to me. What do you say about the cartridge?

Mustafa Mohammed, Peterborough.

Mustala, would you please, please realise that we're a magazine, not a software company! Please, please don't ask for what we can't possibly give: If we could we'd be only too please please-d! It would please, please us no end if US Gold gave Streetlighter II a cartridge release, but there's nothing we can do sorry, sorry!

Praise indeed... as we can't get any better we might as well rest on our laurels, get lazy and self indulgent, and let the magazine go downhill! Only joking — COMMODORE FORCE is the best magazine of its kind, and rest assured we'll keep it that way!

A word about magazine quotes — it's best to take them with a pinch of salt, even when they're from COMMODORE FORCE. For example, we might say 'Despite its oulstanding graphics, this is the worst game I've seen this year. Playability is zero, and you won't load it twice'. An enterprising software company might then print 'outstanding graphics — COMMODORE FORCE'.

The only way to be sure about a game is to keep reading the mag and take heed of the reviews.

Dear Commodore Force,

As you're the suppliers. I feel I must complain an warn other readers about your datasettes. The other week I was trying to play my favourile mus tape in my computer cassette player, and not on did it not work but it also chewed it up! Because was old I won't send you a bill, but what's the poin having a cassette player that won't play music Poul Bailsgrab

You're lucky you didn't make kipper of the month with this one — the point in having the cassette player is to load games into your Commodore 64! That's all it does, and all it was ever intended to do. You're right when you say it won't play music tapes — the C64 designed to work with only one sort of tape drive (the datacorder), and because of this, it can't be connected to an amplifier. Besides w only distribute the datasette, we certainly didn't design it - so ya, boo, sucks to you!

WAGGLEMANIA

Dear Lloyd

am just about sick of Wrestlemania. I know it's got brilliant graphics and stuff, but I hate joystick waggling. I've broken three joysticks so farl Now some questions:

1) Why the hell don't they bring out Super Mario on the C64?

Asargh — gibber gibber gibber!

2) Does anyone know of any tips and cheats for Bart Simpson, Dizzy Down The Rapids, and Treasure Island Dizzy?

The Tipster probably does
— why don't you ask him?

PS Lemmings... Cooll

Another brain dead Lucy - that's all we need! Seriously though, I agree about joystick waggling in general and Wrestlemania in particular. It's such a boring and dated system you'd think someone, somewhere would've come up with something tacter by now, but no - CodeMesters put us through it all over again with Wrestling Superstors, Plus ca change!

WHAT'S HE ON!?

2 — Piease could you help mal lined boarder for loading without action replay cartridge

 Please could you help me by typing out joystick movements.

Please could you send a lact sheet on it all.

Now I've got that off my chest, let's get down to some serious mouning. I'm sick to death of reading 'when will Sonic The Hedgehog or Mario be released on the C64. THEY ON'T — EVER! Dear Lloyd

CONSOLE-D

I'm a loyal C64 owner and I'm writing in anger because of the so-called console take-over. For a start, the major software companies are almost ignoring computers, concentrating on producing carridges for Nintendos and Segas. For the life of me I can't understand how the've become so popular. OK, the Sega Megadrive and Super Nintendo are reasonably priced at £130, but the games are nearly all between £35 and £50. I couldn't believe it when I read Street Fighter 2. (Super NES) is £65. How can Nintendo justify

I'm also annoyed that Commodore seem to be phasing out the C64 by dropping the tape deck. I feel the C64 pack won't sell well this Christmas, unlike the pack I got in 1990. The fact that not as many new games are being released doesn't help. The majority of today's games are budgets. Don't get me wrong, there's some great budget games, but there haven't been enough big releases lately — theire's only Nobby the Arrdvark, Robocop 3, Creatures 2 and a handful

Hopefully we'll soom see a flood of new C64 releases. If not, then I lear by mid 1993 the C64 market could disappear

Jim Johnston, Dunbartonshire, Scotland

I agree the Datassetteless (LMLWD) package was a daft idea, but it doesn't mean Commodore are phasing out the C64. The

I mean COLM reason they released the T2 package without one is they expected demand for the old Commie to decline, and it hasn't anticipating the death of the Commodore, they stopped producing Datasettes and then lound they'd cocked it up righteously!

nough of this football banter, let's look at some PD. Since you've only been in on the scene for a few issues and the scene's been around for decades (well, at least one), it's hard to give an idea of what's difficult and original and what's easy and cliche. It's tough enough giving the 'teel' of a demo when we can only show a few static screenshots! My plan for the coming months is to review some Golden Oldies, and get some ace demos for the covertape — only then can you can hear the fab music and see the complex routines in action. Don't miss the next few issues... but you wouldn't do that anyway, would you?

THAT'S DESIGN

Some time ago there was a regular TV show on German television dedicated to computers and their peripherals, software, demo scenes, etc.

The prizes weren't up to much (two games and a joystick), but the winners from each of the three categories battled it out for the biggie... the PC on which Leisure Suit Larry 2 was programmed (the Larry games are THE most popular RPG's on the PC, featuring a clumsy adult going through a mid-life crisis, and

BLACKMAIL earned their coding wings three or four years ago when they released Sophisticated 3, a demo which included the world premiere of FLI (Flexible Line Interpretation), a routine which enables you to use all 16 colours in a single character instead of the usual four. Not surprisingly Sophisticated 3 spent a long time at Number One in the demo charts!

They then got to work on a project they claimed would put Sophisticated 3 in the shade.

desperately seeking a woman). Anyway. Thiat's Design won the C64 category and eventually the PC as well. beating RED SECTOR's mindblasting Amiga demo Cebit '90 and a rather obscure Atari raster demo-

It was rumoured at the time that a CRAZY member also worked for the TV station, and the whole thing was fixed no one's sure who started the rumour, but there's no getting away from the fact that CRAZY produced an excellent offering that deserved to win on it's merits.

That's Design's very well put together, with excellent graphics, music and coding. The first part features the official HIGHSCORE logo and a

scroller. The unusual thing about this part is that every different scroll-text writer has his own music, so, when GOTCHA's typing you'll hear a tunky tune, and TYCOON has slow music... a novel idea, but somehow it doesn't really work in a demo. Maybe they should try in a soap? Every character with it's own background tune... some Brazilian soaps already do, apparently!

The second section features a very big CRAZY logo each letter taking a

full screen and containing a picture. No bodacious graphics though, they're saved for the next part, which features some awesome FLI graphics swinging across your screen. You get Michael Jackson's face, a logo and a female image, all beautifully drawn. The

last (and most important) part is styledlike a movie, starting and finishing with the credits. Although it's very short (Herbertzan, Tarzar's lailed son, tries to emulae his father's actions and ends up slamming into a tree), it's interesting enough and the movie illusion is maintained throughout. That's Design's an okay demo which certainly lives up to it's name - good design is evident throughout.

team the scene's ever seen - DIARTI

Part one honours the great artists on the machine, showing over 20 title-screens of well known games such as Hawkeye, Hammerfist and more. Later sections

feature FLI-pictures shwing the work of some of the best fantasy-artistsin the world, and there's some interactive (albeinaughty) stuff as well!

The best thing in Duch Breeze is undoubtedly the wonderful animatel sequence showing a dragon flying over a Ditch landscape (you mean that volcanic wastelan's HOLLAND? Remind me not to go there for my lolls - Dep Ed). Words cannot describe the slik presentation found in all

his demo takes us back a few years (1988 to be exact), but it can still go fifteen rounds with the demos of today.

When Norwegian group MEGASTYLE INC release a demo it's usually a classic, perhaps because they take their time instead of rushing them out as fast as possible. They time their releases well too, always releasing a follow-up just as their previous outing starts to slide down the charts. But what would you expect from a group with the brilliant SPARKLER on graphics and the equally excellent SCROLL

programming? As they're prothers they can think on each other's wave-length, resulting in some radical stuff.

The demo starts with the Amiga boot screen (the hand and the workbench disk), and immediately loads the intro where the MSI and

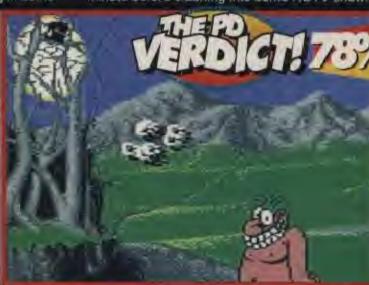

Brainstorm logos swing across the

screen. The second part's the best on the demo; a static background with some nice mountains and trees becomes infested with small sprites, cartoon characters and other weird and zany stuff. Other sections feature dycps which, although old hat now, were extremely original and difficult at the time. MSI used two in this demo, but the current record's about 100. Dycps are considered 'lame' these days, as is trying to top other group's records nowadays interesting design and radical new effects are in vogue.

Apart from some blinking eyes and a mirrorscroller, only the ending's really special. You see a great test-screen which lasts about a minute before crashing into some HDTV snow.

A closer look at the demo shows it to be little more than a slide-show, but it's brilliantly executed and the graphics are exceptional. Dutch Breeze may have taken three years to complete, but it was certainly worth waiting for
